

# Lisbon **Addictions** 2015

First European conference on addictive behaviours and dependencies

# Welcome message

## Welcome to Lisbon Addictions 2015!

The organising committee is happy to welcome you to Lisbon for the First European Conference on addictive behaviours and dependencies.

The Conference was designed to appeal to a multi-disciplinary audience and showcase leading European addiction research, covering the specialist areas of illicit drugs, alcohol, tobacco, gambling and other addictive behaviours. We have invited keynote speakers from across Europe and beyond to challenge approaches and encourage debate.

Over the next few days you will have the opportunity to 'get the most out of' our 16 keynote addresses, some 200 oral presentations, around 140 rapid communications and a week-long array of satellite meetings, side-events and sponsored sessions.

We also encourage you to enjoy all that Lisbon has to offer. Considered as one of Europe's best destinations, the city offers great culture, good value, and beautiful sea and countryside surroundings.

This is an exciting time for the addictions scientific community. We hope Lisbon Addictions will become a regular event and a unique opportunity for networking with researchers, practitioners and policy experts across countries and disciplines.

Thank you for making this possible!

# PROGRAMME

First European conference on addictive behaviours and dependencies

**23—25 September**      **Lisbon | Portugal**

**FIL Meeting Centre - Parque das Nações**

**[www.lisbonaddictions.eu](http://www.lisbonaddictions.eu)**

## PARALLEL SESSIONS

14:30 – 16.00

## Paper sessions

**Paper session 1 - Perspectives on addictions: Environment and context****Chair:** *Michael Farrell, Ireland*

► auditorium II

Addiction as failure in social roles.

*Robin Room, Australia*

Substance abuse and intergenerational transmission of inequity in health: possibilities of preventive action.

*Marja Holmila, Finland*How problematic do victims of harm from others' drinking and people in general perceive such harm? *Ingunn Olea Lund, Norway*Cannabis potency, dosing and smoking behaviour. *Peggy van der Pol, The Netherlands*Implementation of minimal quality standards in drug demand reduction in Belgium: a bottom-up consensus building process involving all relevant stakeholders (COMIQS.BE).  
*Wouter Vanderplasschen, Belgium***Paper session 2 - In the spotlight: gambling****Chair:** *François Beck, France*

► room 2

A multilevel analysis of contextual gambling expenditures among undergraduates. *Sylvia Kairouz, Canada*'You bet, but I don't!' A preliminary study about gaming and gambling perceptions and behaviours among Portuguese youth. *Filipa Calado, United Kingdom*'I am becoming more and more like my eldest brother!' The attenuating effect of parental knowledge on the relationship between older siblings and adolescent problem gambling. *Natale Canale, Italy*  
Patterns, risk factors and gambling-related problems in France: results from the 2014 gambling national survey. *Jean-Michel Costes, France*Country — and individual — level determinants of probable problematic gambling in adolescence: a multi-level cross-national comparison. *Sabrina Molinaro, Italy***Paper session 3 - In the spotlight: smoking****Chair:** *Ann McNeil, United Kingdom*

► room 3

Reconceptualising addiction: insights from research on smoking cessation. *Ron Borland, Australia*Efficacy of smoking cessation treatment interventions for individuals with severe mental illness: a pilot randomised controlled clinical trial. *Donna Pettey, Canada*Perceived relative harm of electronic cigarettes (e-cigarettes) and attitudes towards their availability, advertising and use: a longitudinal survey. *Leonie S. Brose, United Kingdom*The longitudinal association between e-cigarette use and burned cigarette use — is vaping an effective means of smoking reduction or cessation? *Gerhard Gmel, Switzerland*Prevalence and correlates of tobacco use, uptake of cessation resources, and intervention by providers. *Marina Topuridze presented by Nino Maglakelidze, Georgia***Paper session 4 - Measuring addiction: definitions and tools****Chair:** *John Marsden, United Kingdom*

► auditorium III

Prevalence of substance use disorder. A question of definition? *Ludwig Kraus, Germany*Is the CRAFFT a good tool to screen for alcohol abuse in the school context? *Patricia Gómez, Spain*Psychometric properties of the self-administered AUDIT in Spanish adolescents. *Antonio Rial, presented by Manuel Araujo, Spain*The impact of payment by results pilots on recovery outcomes in England. *Andrew Jones, United Kingdom*Effect of patient choice in an adaptive sequential randomisation trial of treatment for alcohol and cocaine dependence. *James R. McKay, USA*

**14:30 – 16:00 Symposium sessions****Symposium session A - Cannabis addiction: what is the problem?**

**Chair:** *Michael Bloomfield, United Kingdom and Valerie Curran, United Kingdom*

► auditorium I

The potential harms of cannabis addiction. *Wayne Hall, Australia*

Cannabis addiction: does epidemiology vary with a country's drug policy? *Paul Griffiths, EMCDDA*

Neuropharmacology of cannabis addiction: evidence from preclinical and clinical research. *Michael Bloomfield, United Kingdom*

Purple haze, Northern lights, skunk and sinsemilla: how does the type of cannabis used influence psychological aspects dependence? *Valerie Curran, United Kingdom*

How can we optimise treatment of people who are cannabis dependent? *Tom Freeman, United Kingdom*

**Symposium session B - Costs and crises: the LEADER project — examining the avoidable burden of drug use in the current economic climate**

**Chair:** *Toni Gual, Spain*

► room 5

Introduction to the LEADER project. *Toni Gual, Spain*

Systematic review on social costs analysis. *Pablo Barrio, Spain*

Systematic review on guidance documents. *Vincenzo Vella, Spain*

Guidance for analysis of social costs. *Zofia Mielecka-Kubien, Poland*

Key messages from the LEADER work on the impact of economic recession. *Paul Lemmens, Belgium and Gera Nagelhout, The Netherlands*

Take home messages. *Jillian Reynolds, Spain*

**14:30 – 16:00 Rapid communication session I**

Cross-level interactions between individual drinking motives and the number of friends present in the drinking situation predict alcohol consumption over the course of the evening. *Johannes Thrul, USA* [1.1]

Who are the hazardous drinkers? Results from the 2012 General Population Survey. *Clara Vital, Portugal* [1.3]

Decriminalisation — a preventive and health promotion approach. *Alcina Ló, Portugal* [1.4]

Substance use disinhibition associated with economically rational decision to quit a boring task. *Torleif Halkjelsvik, Norway* [1.5]

Understanding study abroad students' drinking and drug taking behaviour: a qualitative study. *Giovanni Aresi, Italy* [1.6]

Ten years of 'Addictology' — complex university education for addiction specialists in the Czech Republic. *Amalie Pavlovska, Czech Republic* [1.7]

Smoking habits of Naval School students: is the military environment a risk for tobacco initiation? *Ana Pratas, Portugal* [1.8]

Safety and health in the workplace and psychoactive substances use: guidelines for workplace intervention. *Natacha Torres da Silva, Portugal* [1.9]

Statistical analysis of the social determinants of problematic alcohol consumption at advanced ages in Europe. *Mara Silva, Portugal* [1.10]

Comparison between non-general practice patients and general practice patients treated for substance use problems. *Jérôme Antoine, Belgium* [1.11]

|                                                                                                                                                                                                                                                  |

## Paper session 8 - Treating addictions: cognition and process

**Chair:** *Lars Møller, WHO-Regional Office for Europe (tbc)*

► auditorium III

Assessing and changing implicit cognitive processes in addiction.

*Reinout W. Wiers, The Netherlands*

Executive functions as a mediator of prospective memory performance after a moderate dose of alcohol. *Jamie Smith-Spark, United Kingdom*

Brain reactivity to alcohol and cannabis marketing cues during abstinence and intoxication. *Elizabeth de Sousa Fernandes Perna, The Netherlands*

Mediated mass media effects in cannabis prevention. *William Crano, USA*

mHealth: new approaches for cognitive stimulation of patients with Alcohol Dependence Syndrome. *Pedro Gamito, Portugal*

## Paper session 9 - Perspectives on addictions: targeting diversity

**Chair:** *Catherine Comiskey, Ireland*

► room 5

Effect of use and poly-use of drugs on health evaluated through new indicators: trend of harmful use among the general population. *Emanuela Colasante, presented by Sabrina Molinaro, Italy*

Prescription opioid access and misuse amongst users from the USA, United Kingdom, Australia, and New Zealand: results from the 2015 Global Drug Survey. *Katherine I. Morley, United Kingdom*

Older adults with alcohol use disorder in the German addiction care system: characterisation and specific needs. *Barbara Braun, presented by Hanna Brand, Germany*

The misuse of psychoactive prescription drugs among Finnish adult population. *Karoliina Karjalainen, Finland*

Cohort effect in the General Population Surveys and the reliability and validity of the results on the prevalences of drug use in Portugal. *Casimiro Balsa, Portugal*

16:30 – 18.00 Symposium sessions

| Symposium session C - Addiction and the family                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Symposium session D - Tools for a comprehensive approach to safer and healthier recreational settings                                                                                                                                                                                                                                                               | Symposium session E - Ownership of addiction: stakeholders over time and place                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Financing health and drug policy in Europe in the wake of the 2008–2009 recession: an economic analysis. *Cláudia Costa Storti, EMCDDA* [II.14]

The effects of regular cannabis use during adolescence. *Rita Notarandrea, Canada* [II.15]

Medical cannabis and cannabinoids: promise for general public health, threat for addictions field? *Tomáš Zábanský, Czech Republic* [II.16]

Blood borne diseases in the Czech prisons: disarming a ticking timebomb needs devoted exerts, now! *Tomáš Zábanský, Czech Republic* [II.17]

Development, selection and validation of quality indicators of care following intensive rehabilitation for alcohol dependence: a Delphi study. *Dieter Zeeuws, Belgium* [II.18]

Methodological dilemmas related to the drug use prevalence estimates in the context of an adult population opinion survey. *Borbála Paksi presented by Katalin Felvinczi, Hungary* [II.19]

Bottom-up processes in governance. A case study of the knowledge base for redesigning governance. *Hildegunn Sagvaag, Norway* [II.20]

Analysis of risk factors/determinants of overdose. *Isabel Ponte, Portugal* [II.21]

Cannabidiol (CBD) for the management of cannabis withdrawal: a phase II proof of concept study. *Jan Copeland, Australia* [II.22]

A general population study of adolescents' exposure to cannabis use offers. *Jasmina Burdzovic Andreas, Norway* [II.24]

18:30

Opening reception (at the Conference venue)

2015 EMCDDA SCIENTIFIC PAPER AWARD CEREMONY

## TRANSLATING RESEARCH INTO POLICY AND PRACTICE

09:00 – 10:30

## PLENARY SESSION II

► auditorium I

10:30 – 11:00

Coffee break

11:00 – 12:30

## PARALLEL SESSIONS

| Paper sessions                                                         | Symposium sessions                                                                                                   | Rapid communication session III |
|------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|---------------------------------|
| 10 New opportunities for harm reduction: behaviours. ► room 3          | F Drug users in prison: interventions to reduce harm and enable recovery. ► room 5                                   |                                 |
| 11 New opportunities for harm reduction: infectious diseases. ► room 4 | G Neuro-cognitive predictors of alcohol use: from fundamental research to the development of interventions. ► room 1 |                                 |
| 12 Treating addictions: new insights for therapy. ► auditorium II      |                                                                                                                      |                                 |
| 13 In the spotlight: drug-related deaths. ► auditorium III             |                                                                                                                      |                                 |
| 14 Prevention: theory and evidence. ► auditorium I                     |                                                                                                                      |                                 |
| 15 Perspectives on addictions: shaping policy. ► room 2                |                                                                                                                      |                                 |

12:30 – 14:30

Lunch (at delegates' own expense)

12:45 – 14:15

Sponsored sessions

7. SICAD ► room 1

8. CHAFAEA ► auditorium II

9. Reitox ► room 3

10. EMCDDA/ECDC ► room 2

## NEW FRONTIERS IN ADDICTION RESEARCH

14:30 – 16:00

## PARALLEL SESSIONS

| Paper sessions                                         | Symposium sessions                                                                                                    | Rapid communication session IV |
|--------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|--------------------------------|
| 16 Frontiers: developments in basic research. ► room 2 | H The European Drug Emergencies Network (Euro-DEN): insights into acute drug emergencies in Europe. ► auditorium I    |                                |
| 17 Frontiers: dynamics and change. ► room 5            | I ISAJE symposium: publishing addiction science: scientific integrity and publication opportunities. ► auditorium III |                                |
| 18 Frontiers: addressing complexity. ► auditorium II   |                                                                                                                       |                                |
| 19 Frontiers: methods and analysis I. ► room 3         |                                                                                                                       |                                |
| 20 Frontiers: methods and analysis II. ► room 1        |                                                                                                                       |                                |
| 21 Frontiers: Community perspectives. ► room 4         |                                                                                                                       |                                |

16:00 – 16:30

Coffee break

16:30 – 18:00

## PLENARY SESSION III

► auditorium I

20:00

Conference dinner (pre-booking required)

## TRANSLATING RESEARCH INTO POLICY AND PRACTICE

09:00 – 10:30 **PLENARY SESSION II****Chair:** *Margriet Van Laar, The Netherlands*

► auditorium I

Addictions research and influencing policy: if at first you don't succeed, try try (and try) again. *Linda Bauld, United Kingdom*

Translating research on new psychoactive substances into policy and practice. *Felix Carvalho, Portugal*

Science and recent addiction-related health care policy in the United States. *Keith Humphreys, USA*

Sitting on both sides of the science-policy table. What does each side need from the other and why do they sometimes not get it?

*Marina Davoli, Italy*

10:30 – 11:00

Coffee break

## PARALLEL SESSIONS

11:00 – 12:30 **Paper sessions****Paper session 10 - New opportunities for harm reduction: behaviours****Chair:** *Franz Trautmann, The Netherlands*

► room 3

Crack use and lesions due to glass pipes: a bridge for HCV transmission — results from the ANRS–Crack Intervention Trial. *Marie Jauffret-Roustide, France*

Recent developments in the detection of harms arising from the use of synthetic cathinones in Europe. *Ana Gallegos, EMCDDA*

Identifying local harm reduction priorities: involving drugs users and professionals. *Louis Favril, Belgium*

**Paper session 11 - New opportunities for harm reduction: infectious diseases****Chair:** *Richard Pates, United Kingdom*

► room 4

How should scale up of HCV antiviral treatment be prioritised? A cost-effectiveness analysis including individual and population prevention benefits.

*Matthew Hickman, United Kingdom*

HCV/HIV coinfection among people who inject drugs entering opioid substitution treatment in Greece: prevalence and correlates. *Anastasios Fotiou, Greece*

Estimation of prevalence of HCV among IDUs in Poland and identification of risk factors. *Janusz Sieroslawski, Poland*

**Paper session 12 - Treating addictions: new insights for therapy****Chair:** *Dagmar Hedrich, EMCDDA*

► auditorium II

Hidden harms and benefits: the impact of partners, parenthood and childcare on drug treatment outcomes.

*Catherine M. Comiskey, Ireland*

Initial findings from a mixed-methods feasibility and effectiveness evaluation of the 'Breaking Free Health & Justice' treatment and recovery programme for substance misuse in prison settings. *Sarah Elison, United Kingdom*

Alcohol brief intervention in patients in methadone maintenance programmes: a pre-experimental study. *Nidia Rosa, Portugal*

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## 11:00 – 12:30 Symposium sessions

**Symposium session F - Drug users in prison: interventions to reduce harm and enable recovery****Chair:** *Charlie Lloyd, United Kingdom*

► room 5

Substance use and specific health needs of drug users inside European prisons: what do we know? *Linda Montanari, EMCDDA*

Global overview of the transfer of harm reduction into prisons. *Heino Stöver, Germany*

What works for reintegration after prison release: findings from a European study. *Heike Zurhold, Germany*

Prison based drug treatment for women: offender's perspectives on Drug Recovery Wings. *Sharon Grace, United Kingdom*

**Symposium session G - Neuro-cognitive predictors of alcohol use: from fundamental research to the development of interventions****Chair:** *Helle Larsen, The Netherlands*

► room 1

Associations between alcohol-related cognitions and alcohol use with a cultural perspective. *Thomas Pronk, The Netherlands*

Findings from a longitudinal study in adolescents. *Margot Peeters, The Netherlands*

Contribution from *Kyriaki Nikolaous, United Kingdom*

Conclusions with focus on future directions. *Reinout Wiers, The Netherlands*

## 11:00 – 12:30 Rapid communication session III

The role of individual and social capital on cocaine addiction recovery. *Anne Dekkers, Belgium* [III.1]

CRAFT validation study in a Spanish sample: psychometric properties and recommendations. *Manuel Araujo Gallego, Spain* [III.2]

Systemically-focused substance abuse prevention strategies from India's addiction treatment professionals: results from a national survey using a mixed-method research design. *Sebastian A. Perumbilly, USA* [III.3]

Executive functions as predictor of substance use disorder and social adjustment: a sequential logistic regression approach. Preliminary results. *Egon Hagen, Norway* [III.4]

Mitochondrial energy activity failure in drug addiction — preliminary study. *Cândida Mendes presented by Manuela Grazina, Portugal* [III.5]

Drug-related deaths (DRAMES survey): focus on the Languedoc-Roussillon region. *Céline Eiden, France* [III.6]

Epidemiologic profile of users assisted in a psychosocial care centre for type iii adults. *Paula Silva, Brazil* [III.7]

Translating knowledge for better practices in psychological prevention and treatment in alcohol-related problems. *Ana Nunes da Silva, Portugal* [III.8]

Mapping drug users: the example of the Emilia Romagna region. *Stefano Salvadori, Italy* [III.9]

The use of suboxone (buprenorphine and naloxone) in prison. *Fadi Meroueh, France* [III.10]

The Operational Plan for Integrated Responses is a structural measure implemented at national level that promotes accurate assessments and the development of integrated interventions at local level. *Madalena Cruchinho presented by Paula Frango, Portugal* [III.11]

Thursday 24 September

Do guidelines for alcohol and drug treatment capture what comprehensive theories on understanding addiction tell us is important in treatment? A review of five guidelines. *Espen Andreas Enoksen, Norway* [III.12]

Room for action? How service managers in three Scandinavian cities experience their possibilities to develop their services. *Ole Næss, Norway* [III.13]

Injection-related disorders among Moscow street drug users. *Sofia Fedorova, Russia* [III.14]

Before you get burned: seven years of peer counselling and harm reduction in university students' festivals. *Irma Brito, Portugal* [III.15]

Innovation and social reintegration: evaluation of a new form of governance in public action for the social rehabilitation of drug addicts. *François Vedelago, France* [III.16]

City level drug policies in Europe — a documentary analysis. *Eoghan Quigley, EMCDDA* [III.17]

Understanding and evaluating effective interventions for prevention of adolescent substance use: what we know from research and what we can transfer into practice. *Roberta Molinar, Italy* [III.18]

Ageing and addiction: are European addiction treatment systems ready for the challenges ahead? *Alessandro Pirona, EMCDDA* [III.19]

Supervised consumption services: the Greek experience. *Meni Malliori, Greece* [III.20]

Alcohol use in Galician secondary school population (Spain): current data and related variables. *Patricia Gómez, Spain* [III.21]

Adjustment of buprenorphine/naloxone dose desired by heroin-dependent patients: comparison of non-modifiers, raisers and reducers. *José Pérez de los Cobos, Spain* [III.22]

URICA maintenance subscale and frequency of recent cocaine use independently predict cocaine-positive baseline urine at inpatient detoxification treatment. *José Pérez de los Cobos, Spain* [III.23]

Guidelines for Social and Community Mediation in the field of reintegration of people with addictive behaviours and dependencies. *Sara Carvalho, Portugal* [III.24]

Characterisation of CYP2D6 genotypes in drug addicts — a preliminary study. *Carolina Ribeiro presented by Manuela Grazina, Portugal* [III.25]

12:30 – 14:30

Lunch (at delegates' own expense)

12:45 – 14:15 Sponsored sessions

| Sponsored session 7. SiCAD<br>(General-Directorate for Intervention on Addictive Behaviours and Dependencies) | Sponsored session 8. CHAFAEA<br>(Consumers, Health, Agriculture and Food Executive Agency)                                    | Sponsored session 9. Reitox<br>(Réseau Européen d'Information sur les Drogues et les Toxicomanies)                              | Sponsored session 10. EMCDDA/ECDC<br>(European Monitoring Centre for Drugs and Drug Addiction/European Centre for Disease Prevention and Control) |
|---------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| ► room 1<br><br>Public health approach as a basis for drug policy: the Portuguese experience.                 | ► auditorium II<br><br>Actions with the aim to prevent blood-borne infections and reduce health-related harm due to drug use. | ► room 3<br><br>Understanding the risks and benefits of OST in Europe: triangulating data from monitoring and research sources. | ► room 2<br><br>Scaling up responses to hepatitis C among PWID in Europe: what are the priorities? A European agency and clinician's perspective. |

## NEW FRONTIERS IN ADDICTION RESEARCH

## PARALLEL SESSIONS

14:30 – 16:00

Paper sessions

**Paper session 16 - Frontiers: developments in basic research****Chair:** *Manuela Grazina, Portugal*

► room 2

Methamphetamine self-administration leads to blood-brain barrier dysfunction: an animal study. *Ana Paula Silva, Portugal*

Methamphetamine-induced changes in hippocampal neurons morphology is mediated by Rac1 activation. *Teresa Summavielle, Portugal*

Dysfunctions of cognitive control in addiction: Advances and needs in current research. *Anja Kräplin, Germany*

Brain Damage in Ketamine Abusers. *Wai Kwong Tang, China*

**Paper session 17 - Frontiers: dynamics and change****Chair:** *Maria Renström, WHO*

► room 5

Increase of opioid use in Finland — when is there enough key indicator data to state a trend? *Martta Forsell, Finland*

Protective factors associated with cessation of injecting drug use among a Canadian cohort of people who inject drugs. *Serena Luchenski, United Kingdom*

Drug-induced causes of death comprised three groups: persons with very low socioeconomic status, disabled, and persons on the edge of the workforce. A register linkage study. *Ellen J. Amundsen, Norway*

Substance use among men who have sex with men in Portugal: a comparison between migrants and non-migrants in the European MSM Internet Survey (EMIS). *Ana Martins, Portugal*

The European alcopops boom in hindsight: what's left and what can be learned? *Julian Strizek, Austria*

**Paper session 18 - Frontiers: addressing complexity****Chair:** *Kim Bloomfield, Denmark*

► auditorium II

Substance use among Dutch homeless people, a follow-up study: prevalence, pattern and housing status. *Dike Van de Mheen, Netherlands*

Psychiatric co-morbidity in substance abuse treatment: analysing the current health care situation. *Hanna Brand, Germany*

Searching for sobriety: a qualitative study of how persons with severe mental illness experience abstaining from substance use. *Henning Petersen, Norway*

Treating tobacco dependence and cannabis misuse at the same time — feasibility of a group cessation programme. *Michael P. Schaub, Switzerland*

How is problem gambling stigmatised? Insights from a mixed-method study of public and self-stigma associated with problem gambling. *Nerilee Hing, Australia*

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

New Psychoactive Substances (NPS) in Euro-DEN: epidemiology and patterns of toxicity associated with NPS. *David Wood, United Kingdom*

Cannabis presentations in Euro-DEN: An overview of the Euro-DEN data on cannabis-related presentations and cannabis cardiotoxicity. *Alison Dines, United Kingdom*

Implications of benzodiazepines: geographical patterns in the benzodiazepines responsible for toxicity around Europe and the pattern of toxicity seen in individuals with acute benzodiazepine toxicity resulting from non-medical misuse. *Christopher Yates, Spain*

Emergency health consequences of cannabis use in Europe: a need for more unified approach in data collection? *Marcis Trapencieris, Latvia*

How and where to publish: publication opportunities in addiction science. *Kerstin Stenius, Finland*

The growth of education and training activities in addiction science. *Michal Miovsky, Czech Republic* and *Richard Pates, United Kingdom*

Scientific fraud, conflict of interest and lesser evils: the need for ethicality in addiction science. *Thomas Babor, USA*

#### 14:30 – 16:00 Rapid communication session IV

Addiction, families and treatment. A critical realist search for theories that can improve practice. *Anne Schanche Selbekk, Norway* [IV.1]

Methylphenidate substitution for methamphetamine addiction: a unique case series. *Roman Gabrhelik, Czech Republic* [IV.2]

'I have no clue what I drunk last night'. Using smartphone technology to compare in-vivo and retrospective self-reports of alcohol consumption. *Roberta Monk, presented by Derek Heim, United Kingdom* [IV.3]

Estimating the number of problem drug users with mortality data when drug-related deaths are under-reported: a case study. *Eric Janssen, France* [IV.4]

Early intervention for adolescent substance use and abuse in Switzerland: The DEPART program. *Nicolas Meylan, Switzerland* [IV.5]

Ethics of addiction research: conceptual critique of the drug-centred view. *Susanne Uusitalo, Finland* [IV.8]

Drinking patterns and alcohol use disorder characteristics in senior citizens with DSM-5 alcohol use disorder entering an outpatient short-term intervention: results from a randomised clinical trial. *Silke Behrendt, Germany* [IV.9]

High risk drug users: ESPAD, therapeutic communities and harm reduction services surveys and data analyses to understand various aspects of the lifestyle and risk behaviour. *Luca di Censi, Italy* [IV.10]

Think tanks and addictions in the EU — a network study. *David Miller, United Kingdom* [IV.11]

The use and misuse of sodium oxybate in Italian alcohol dependent patients: results from the GUM study. *Felice Nava, Italy* [IV.12]

Pharmaceuticalisation of drug cultures: qualitative study on polydrug use and user networks on the Internet. *Sanna Rönkä, Finland* [IV.13]

Social resources and their association with outcomes of alcohol treatment in different age groups. A literature review. *Anne Kohlmann, Germany* [IV.14]

Crisis intervention related to the use of psychoactive substances in recreational settings — evaluating the Kosmicare Project at Boom Festival. *Paula Frango, Portugal* [IV.15]

- Gender differences among current Internet gamers — results from an Internet based survey in Singapore. *Pratika Satghare, Singapore* [IV.16]
- A comparison between sewage-based epidemiology and epidemiological research on drug use in the general population. *Janelle van Wel, Belgium* [IV.17]
- Trajectories of alcohol consumption and association with symptoms of depression from early to late adolescence. The Norwegian Longitudinal Health Behaviour Study. *Jens Christoffer Skogen, Norway* [IV.18]
- Effectiveness of video enabled relapse prevention intervention (VERPI) among alcohol dependent individuals: a prospective study at central and state government mental health settings in India. *Prasanthi Nattala, India* [IV.20]
- Social media addiction was influenced by quality family time among adolescents in Bangkok Metropolitan. *Asara Vasupanrajit, Thailand* [IV.21]
- Identifying research priorities for illicit drugs in Europe. *Charlotte Davies, United Kingdom* [IV.22]
- A preliminary exploration of the gender dimension of non-medical use of prescription drugs in Europe and the Mediterranean region through expert submitted secondary data. *Marilyn Clark, Pompidou Group* [IV.23]
- Ketamine: medical indications, recreational use and abuse liability. *Cécile Chevallier, France* [IV.24]

16:00 – 16:30

Coffee break

16:30 – 18:00 **PLENARY SESSION III**

**Chair:** *Henrique Lopes, Portugal*

► auditorium I

**Alcohol research and policy: joining the dots.** *Pia Mäkelä, Finland*

**Behavioural addictions: the lack of an “enough” button for pleasurable actions?** *Gerhard Bühringer, Germany*

**Infrastructure in Addiction Science: the emergence of an interdisciplinary field and its implications for public health policy.**  
*Thomas Babor, USA*

**Gambling and age: a complex relationship throughout life.** *Susana Jiménez Murcia, Spain*

20:00

Conference dinner (pre-booking required)

CHALLENGES OF ADDICTION IN AN INTERCONNECTED WORLD

## Symposium session L - E-health and addictions: virtual interventions in a virtual reality for real life substance-related problems

Chair: *Alessandro Pirona, EMCDDA and Cinthia Menel-Lemos, CHAFAEA*

► room 5

Cost-effectiveness of e-health interventions for substance use disorders: modelling the cost-effectiveness of health care systems for alcohol use disorders — how implementation of eHealth interventions improves cost-effectiveness. *Joran Lokkerbol, The Netherlands*

Managing addictions via mobile applications: a smartphone app to aid smoking cessation — preliminary evaluation of SF28 and characterising smoking cessation smartphone apps in terms of behaviour change techniques. *Harveen Ubhi, United Kingdom*

Outreach and harm reduction via online platforms and mobile apps: the Social Intervention Tool, an advanced chat tool for internet-based outreach for drug users, sex workers, MSM and young people at risk. *Pjer Vriens, The Netherlands*

Managing addictions via mobile applications: a smartphone app to assist management of cannabis use. *Jan Copeland, Australia*

## Symposium session M - From ALICE RAP to UNGASS

Chair: *Peter Anderson, United Kingdom*

► room 4

From the EU to UNGASS. *Franz Trautmann, The Netherlands*

Well-being frame to reduce the perverse consequences of drug policies. *Toni Gual, Spain*

Toxicology as a basis for rational policy. *Dirk Lachenmeier, Germany*

Trendsetters in drug policy. *Tamyko Ysa, Spain*

Open discussion of the findings and their relevance and implications.

## 11:00 – 12:30 Rapid communication session V

Translation and adaptation of the game addiction scale in an adolescent sample: Portuguese version. *Nidia Rosa, Portugal* [V.1]

High biological-based HCV incidence and increasing frequency of high-risk practices among IDUs in France: what are the implications for harm reduction models? *Marie Jauffret-Roustide, France* [V.2]

Drug trends between 1994 and 2014 in Hungary — expansion of designer drugs. *Eva Keller, Hungary* [V.3]

Factors predicting speed of transition to opportunity to use cannabis, and from opportunity to cannabis dependence. *Lindsey A. Hines, United Kingdom* [V.4]

Comparing alcohol use between migrants and non-migrants in Germany: who might be at risk and why? An epidemiological study. *Elena Gomes de Matos, Germany* [V.5]

Alcohol, crack/cocaine and violence in Brazil: data from the Brazilian National Alcohol and Drugs Survey (BNADS 2006/2012). *Clarice Sandi Madruga, Brazil* [V.6]

Crackland in Brazil, a failed experience of legalisation and attempts to build up a network of assistance. *Clarice Sandi Madruga, Brazil* [V.7]

Problematic Internet use in Malta amongst young people aged between 18–30 years: a quantitative study. *Anna Maria Vella, Malta* [V.8]

Elicitation research for the construction of a prevention programme of alcohol-related problems. *Raúl Melo, Portugal* [V.9]

Local community and school setting as the place for implementation of prevention in Central Asia. *Bogusława Bukowska, Poland* [V.10]

Problematic Internet use (PIU) in Portuguese adolescents: an exploratory study of wellbeing outcomes. *Ivone Patrão, Portugal* [V.11]

A successful strategy for linking anonymous data of children and parents in a school-based trial. *Roman Gabrhelik, Czech Republic* [V.12]

Tracking NPS: Nuclear Magnetic Resonance (NMR) for a rapid identification of new substances. *Helena Gaspar, Portugal* [V.13]

New Psychoactive Substances in Europe. *Roumen Sedefov, EMCDDA* [V.14]

How do the four Ps of marketing contribute to initiation, risky use and harmful use of alcohol, tobacco and gambling? A synthesis of evidence. *Martine Stead, United Kingdom* [V.15]

Recent developments in detection of harms arising from the use of synthetic cannabinoid receptor agonists in Europe. *Andrew Cunningham, EMCDDA* [V.16]

New Psychoactive Substances in Europe: New Psychoactive Substances among people using drugs heavily – Towards effective and comprehensive health responses in Europe. *Cristiana Vale Pires, Portugal* [V.17]

Cannabis-related indicators: up or down? Good or bad? What do the data tell us? *João Matias, EMCDDA* [V.18]

Offline and online characterisation of Portuguese pathological gamblers: results. *Pedro Hubert, Portugal* [V.19]

The experience of the use of psychedelic substances. *Joana M. N. Pereira, Portugal* [V.20]

Harm reduction and HIV/HCV responses for several populations. The challenge of integrating responses. *Ricardo Fuertes, Portugal* [V.21]

Cannabis and psychosis: What kind of link? *Mohamed Ben Amar, Canada* [V.22]

Screening of problematic Internet use in adolescents from Galicia (Spain): current data and related variables. *Patricia Gómez, Spain* [V.23]

Education and specialization of addiction professionals in the Czech Republic in comparison to other European countries (systematic review). *Michal Miovsky, Czech Republic* [V.24]

Coping with stress and personality hardiness of clients with and without ADHD in therapeutic communities in the Czech Republic. *Lenka Cablova, Czech Republic* [V.25]

Risk of HCV infection among heroin and methamphetamine users. *Lubomir Okruhlica, Slovakia* [V.26]

Emergency health consequences of cannabis use in Europe: a need for more unified approach in data collection? *Marcis Trapencieris, Latvia* [V.28]

Old dog, new tricks? Making use of opiate supply and markets information for horizon scanning. *Nicola Singleton, EMCDDA* [V.29]

Prevention and Policy foresight 2025 — a Delphi expert panel study on efficacy. *Katariina Warpenius, Finland* [V.30]

The austerity measures and the Portuguese model of drug policy: an exploratory mixed method research. *Maria João Oliveira, Portugal* [V.31]

Parachuting psychoactives substances: a sustained-release form? *Amélie Daveluy, France* [V.32]

Shaken, not stirred: what are consumers taking with their cocaine dose. *Ana Matias, Portugal* [V.33]

Comparison of Paper-and-Pencil versus Web Administration on self-reports of sensitive and non-sensitive behaviors among students: participation, data quality and prevalence estimates. *Sabrina Molinaro, Italy* [V.34]

Regional drug strategies across the world. *Danilo Ballotta, EMCDDA* [V.35]

European guidelines for the evaluation of national drug strategies and action plans. *Charlotte Colman, Belgium* [V.36]

Problematic Facebook use: the role of psychosocial variables in an Italian adolescents study. *Valerio Salvati, Italy* [V.37]
